## I. INTRODUCTION

### A. PURPOSE OF THIS REQUEST FOR PROPOSALS

The purpose of this Request for Proposals is to issue a Spaceport Construction Management Services contract to oversee and manage the phase 2 construction activities at Spaceport America. Activities include, but are not limited to the Visitor Experience facilities, the runway extension, internal road re-alignment, the entrance facility and associated utilities extension.

### B. VISION

The vision of the Spaceport is to be the world's premier commercial space launch facility providing first class service to its customers and delighting and inspiring its visitors. The Spaceport Construction Management Services will assist NMSA in successfully completing Phase 2 construction activities.

### C. SUMMARY SCOPE OF WORK

The scope of work shall consist of the performance of construction management activities primarily at Spaceport America in Upham, New Mexico. This contract includes all labor and materials required to perform day-to-day management of the construction process with the goal of a quality product on time and within budget. The Construction Manager (CM) shall oversee all aspects of pre-construction, construction and post-construction phases of the projects and represent NMSA in all aspects of quality control, value engineering, scheduling and budget management. The construction management services shall not duplicate and are in addition to the normal scope of separate architects or engineering contracts. Also note that two facilities will be built and owned by a third party - one Welcome Center and the Visitor Center. The role of the CM for those facilities will be as a Leasor's representative vice an Owner's representative as is the case with the other Spaceport facilities. The Offeror should clearly address in his proposal the approach to performing the two distinct roles on behalf of NMSA. NMSA believes the level of effort for each role will be significantly different. The CM shall hold in good standing a New Mexico General Contractor license (GB-98), and shall maximize the use of licensed New Mexico subcontractors as needed.

The primary envisioned projects are an off-site Welcome Center in Truth or Consequences, NM, an on-site Visitor Center, Security Facility/Gates, Runway Extension, rip/rap around the runway, internal road realignment, Fit out construction of the Virgin Galactic Gateway to Space 4000 sq ft NMSA area, Fit out construction of the Spaceport Operations Center (SOC) and water, wastewater, electric, communications extension to the Visitor Center and Security Facility.

The detailed scope of work is in Attachment A.

### D. SCOPE OF PROCUREMENT

The contract is intended to be a Time and Materials (T&M) contract and is scheduled to begin on or about September 26, 2012. The contract term will be 18 months with possible options up to 4 years. In no circumstance shall this contract extend beyond a term of four years. Although it is the intention of NMSA to make a single award for this service, NMSA reserves the right to make multiple awards or no award if this is deemed in the best interest of NMSA with NMSA being the sole judge thereof. The NMSA reserves the right to make an award upon the basis of the technical and price proposals without discussions. Based on the

importance of this project, NMSA deems it to be in its best interest to consider award to other than the lowest priced Offeror.

- Demonstrate and explain the methodology for accomplishing the work. Information may be summary in nature, but should be of sufficient detail to adequately assess and determine Offeror's understanding of the work scope and mastery of the services and processes necessary to ensure successful execution in the field to include:

3. The Evaluation Committee may use other sources of information to perform the evaluation.
4. Responsive proposals will be evaluated on the factors in Section V that have been assigned a point value. The responsive Offerors with the highest scores will be selected as finalist Offeror's based upon the proposals submitted. Finalist Offerors who are asked or choose to submit revised proposals for the purpose of obtaining revised offers will have their points recalculated accordingly. While specific points will not be awarded based on oral presentations, proposal points will be recalculated based on how well the Offeror further described their support of the evaluation factors listed in Section A above. The responsive Offeror whose proposal is most advantageous to the Agency, taking into consideration the evaluation factors in Section V, will be recommended for contract award. Please note, however, that a serious deficiency in the response to any one factor (i.e., any circumstance, experience, cost etc. that results in a score of less than half of the weight for any individual category) may be grounds for rejection regardless of overall score. Based on the importance of this project, NMSA deems it to be in the best interest to consider award to other than the lowest priced Offeror.

- Responsiveness to and communication with New Mexico Spaceport Authority on a daily basis
- Minimal inter-contractor seam disputes

### 2. Assumptions

The CM shall provide a trailer on-site at the Spaceport for office space with water / toilet accommodations. CM shall provide own IT / Communications equipment. The CM shall manage the following activities:

- Off-site Welcome Center in Truth or Consequences\*;
- On-site Visitor Center\*;
- 2000ft runway extension plus rip/rap around the runway;
- Fit out construction of the Virgin Galactic Gateway to Space 4000 sq ft NMSA area;
- Fit out construction of the Spaceport Operations Center (SOC); and
- On-site security facility which includes internal road re-alignment and water, electric, communications and wastewater system extension construction from the Terminal Hangar Facility to the Security Facility.

\*Note: the offsite Welcome Center and the onsite Visitor Center will be built and owned by a third party (not NMSA). NMSA will lease these facilities. Thus the CM will serve as a Leasor's representative for these two facilities vice an Owner's representative.

### 3. Summary

NMSA is seeking Construction Management proposals that are cost effective while producing a quality outcome ensuring construction contractors meet their commitments in terms of quality, price and schedule. NMSA anticipates approximately two (2) full time equivalents (FTE) to accomplish these services. NMSA's expectation is that the construction contractors are to be held accountable and deliver a quality product on time and within budget. The CM's role will be to manage these activities as NMSA's representative.

Note: Construction Management Services shall not duplicate and are in addition to the normal scope of separate architect or engineering contracts.

The primary responsibility of the CM shall be to represent NMSA throughout the construction process, maintain responsibility for day-to-day management of the construction process, and to deliver the project safely, on time, within budget, without claims, and of the highest quality. NMSA expects the selected firm to assume responsibility and accountability standards as if the selected firm were the NMSA.

The CM shall be required to provide the sufficient and appropriate number of experienced qualified personnel from time of hiring until final completion of the professional services contract. The CM shall provide a copy of a valid GB-98 license from New Mexico and any other certificate or license required by Federal or State

regulatory bodies with the proposal. On-site support staff will be as appropriate to the phase of work in progress.

The CM shall develop and implement a work plan that includes estimating and scheduling services as well as expertise in safety, wage rate compliance, partnering, and claims management of the State of New Mexico. All CM personnel shall have appropriate experience in construction management on complex construction projects of a similar nature. The CM shall develop and implement a system for monitoring construction in progress to ensure there are no deviations from cost, quality and completion dates. A more detailed explanation of the services to be provided by the CM is shown below. NMSA may request additional services be provided by the CM at NMSA’s discretion.

For the purpose of preparing proposals, Offerors are to assume that on-site work will be performed primarily at the Spaceport near Upham, New Mexico. Offerors should assume that off-site work will be performed at Truth or Consequences. Contractor management staff will be expected to attend management meetings as required on request of NMSA.

The CM is expected to follow two different management models as explained herein:

**NMSA as Owner.** This applies to the construction of the 2000ft Runway Extension; with rip/rap around the runway; the Security Facility (~500 sq ft); water, electric, communications, wastewater system extension from the Terminal Hangar Facility to the Security Facility ~300 ft and road realignment from the entrance to the Security Facility.

This model can be considered the traditional CM. The CM is expected to facilitate and conduct weekly and monthly NMSA construction meetings and put out the minutes/correspondence and action items of the meetings. CM provides to NMSA weekly progress reports for each project and will process and recommend payment of all construction pay applications in coordination with the architects. CM also will project and phase the overall budget and schedule. This will track and manage the inchstones and milestones for each project schedule.

**NMSA as Leasor.** This applies to the one Welcome Center in T or C and the on-site Visitor Center.

This model is the non-traditional CM. The CM is expected to participate in all Visitor Center and Welcome Center construction meetings as the Leasor's representative. The CM is expected to provide the Leasor with adequate information regarding the developer's progress. This should be accomplished by some sort of agreement to communicate between the CM, the architect and the developer.
