

Owners are showing an increased interest in CM services because they can save them time and money, increase project quality, and CMs offer a single point of accountability on complex projects.

"CCMs reduce our risk on construction projections and reducing risk is what makes us successful. By reducing cost and reducing time on projects, we find we are far more successful with CCMs leading our effort."

Stephen T. Ayers, FAIA, LEED AP
Architect of the Capitol

CCMs are in Demand:
In a recent survey, 63% of organizations give more opportunity for projects or increased finances to CCMs.

"CCM is the one designation that is truly on target with what we do."

Blake Peck, CCM
McDonough Bolyard Peck

Certified Construction Manager

CM Professionals Are CCMs

CM certification recognizes professionals who have chosen a career in construction management and verified their knowledge and experience through the Construction Manager Certification Institute's (CMCI) American National Standard Institute's (ANSI) accredited process.

Employers understand candidates who have a certification from a quality source demonstrate competence through independent assessment, such as the CCM. The CCM enables you to:

- **Increase your Professional Marketability:** Because the CCM is accredited and internationally recognized, the CCM can be the difference between getting an interview and having your resume overlooked.
- **Manage your Experience and Maintain your Professionalism:** The CCM is a sign of professional achievement and will help you exhibit to clients, supervisors you are dedicated to your profession and that you've mastered the critical knowledge of the latest construction management techniques.
- **Enhance your Professional Network:** Not only will you earn the respect of peers, clients and employers when you earn a CCM, but you will also increase your network of professional Construction Managers.

The CCM is the only Construction Manager certification accredited by the American National Standards Institute (ANSI) in accordance with 17024 International Standards Organization (ISO) standard. With this accreditation, the Construction Manager Certification Institute (CMCI) anticipates that significant opportunities for CCMs will continue to open in the U.S. and around the world.
